GAS LEVEL SNIFFER

ABOUT :

A gas detector is a device that detects the presence of gases in an area, often as part of a safety system. A gas detector can sound an alarm to operators in the area where the leak is occurring, giving them the opportunity to leave.

This system triggers LED and buzzer to alert people when Hazardous gas leakage is detected. This system is very simple yet reliable. With the gas leak detector you can ensure the right climate in your industry. The gas leak detector measures the several gas content of the air, the relative humidity and the room temperature.
